

Jay Vaghela

DevOps Engineer

Ahmedabad, Gujarat, India | +91 9033841360 | jayvaghela0312@gmail.com | Portfolio | LinkedIn | GitHub

Professional Summary

DevOps and Cloud Engineering enthusiast with real-world experience in building native applications. I have worked on automating deployments and managing infrastructure using AWS, Terraform, Docker, Kubernetes and GitHub Actions. I am skilled in Python, FastAPI and Linux. I use Infrastructure as Code to manage systems efficiently. I have hands-on experience with CI/CD pipelines, containerization, cloud monitoring and backend development. I care deeply about creating systems that're secure, scalable and highly available. I am always. Growing my knowledge, in cloud technologies and DevOps automation.

Technical Skills

Cloud & DevOps: AWS, Docker, Kubernetes, Jenkins, Git, GitHub, Linux, Shell Scripting, Nginx, Prometheus, Grafana, Helm (Basic)

CI/CD & Automation: Jenkins CI/CD, Docker Image Build & Deployment, Git/GitHub, DevOps Automation

Infrastructure & Monitoring: AWS Cloud Infrastructure, Kubernetes Deployments & Services, Prometheus, Grafana, Linux Administration

Languages: Python, Java, JavaScript, SQL, HTML5, CSS3

Frameworks & Libraries: FastAPI, Jinja, SQLAlchemy

Core Competencies: CI/CD, Continuous Integration, Continuous Deployment, Containerization, Cloud Infrastructure, Linux Administration, Version Control, Cloud Monitoring, Infrastructure Automation, Troubleshooting

Projects

HelpingHands React.js, FastAPI, PostgreSQL, Docker, Kubernetes, AWS RDS, Jenkins, Git

- Developed and deployed a full-stack volunteering platform using React.js, FastAPI, and PostgreSQL.
- Dockerised frontend and backend services, built Docker images, and pushed images to Docker Hub for deployment.
- Deployed containerized applications on Kubernetes using Deployments and Services, with the backend connected to AWS RDS PostgreSQL.
- Built and maintained a Jenkins CI/CD pipeline to automate Docker image builds, registry pushes, and Kubernetes deployments.
- Configured application environment variables and Kubernetes Secrets for secure runtime configuration.
- Used GitHub for version control and managed application source code and deployment configurations.
- Configured AWS infrastructure and Amazon EKS to support scalable Kubernetes-based application deployment.

EKS Cluster & CI/CD Automation

AWS, Kubernetes, Terraform, Jenkins, Docker

- Provisioned and managed production-grade AWS EKS clusters using eksctl and kubectl Auto Mode for scalable container orchestration.
- Built reusable, version-controlled infrastructure environments across staging and production using Terraform Infrastructure as Code.
- Engineered automated CI/CD pipelines via Jenkins to build, test, and push containerized Docker images.
- Streamlined continuous delivery workflows by deploying automated application updates directly into Kubernetes cluster namespaces.

Certifications

Completed

- DevOps on AWS: Project Management — Coursera
- Python Crash Course — Coursera
- AWS Cloud Practitioner Essentials Training — AWS Skill Builder

Education

Shri Chimanbhai Patel Post Graduate Institute of Computer Applications

2025 – Present

Master of Computer Applications (MCA)

Silver Oak University

2022 – 2025

Bachelor of Computer Applications (BCA)
